Um email suspeito foi identificado na caixa de entrada com um anexo em PDF codificado em base64. Minha missão é decodificar e visualizar a mensagem. Para isso irei usar o decodificador de PDF **apivoid**:

<https://www.apivoid.com/tools/base64-to-pdf/>

Colando a mensagem e clicando em Generate PDF Document a mensagem foi:

THM{BENIGN_PDF_ATTACHMENT}

The screenshot shows the 'apivoid' website interface. At the top, there is a navigation bar with links: Products, Tools, Use Cases, Pricing, Resources, Company, Book a Call, and Log In. The main content area features a large text input field containing the base64-decoded PDF content. Below the input field is a button labeled 'Generate PDF Document'. At the bottom, there is a preview of the generated PDF document, which displays the text 'THM{BENIGN_PDF_ATTACHMENT}'.
