

Analisar o relatório associado a um hash

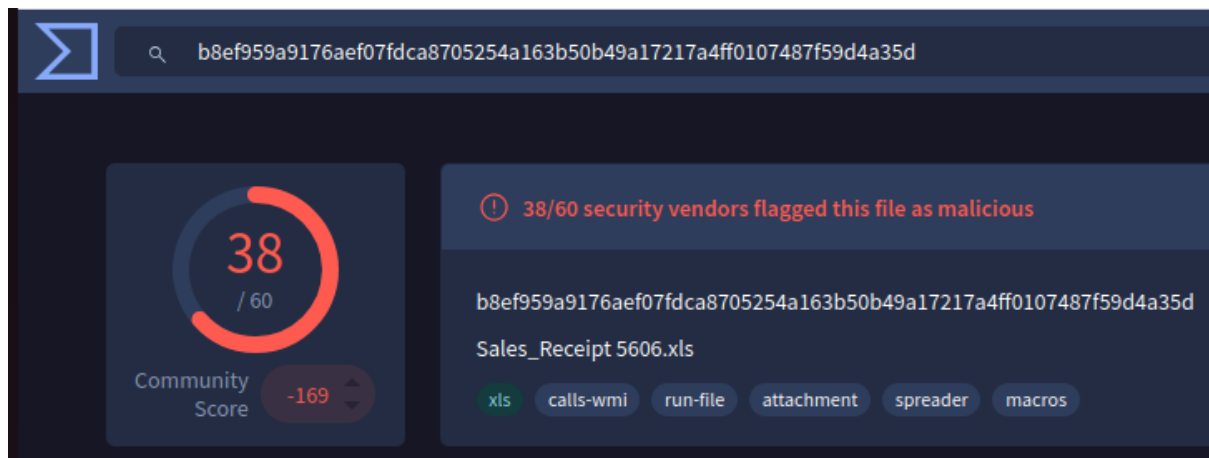

Nesse laboratório missa missão é muito simples analisar o relatório associado ao hash: b8ef959a9176aef07fdca8705254a163b50b49a17217a4ff0107487f59d4a35d e descobrir qual é o nome do arquivo de amostra?

Para essa missão usarei o VirusTotal:

<https://www.virustotal.com/gui/home/search>

The image shows the VirusTotal search page. At the top is the VirusTotal logo, which consists of a blue square with a white stylized 'V' and the word 'VIRUSTOTAL' in blue capital letters. Below the logo is a tagline: 'Analyse suspicious files, domains, IPs and URLs to detect malware and other breaches, automatically share them with the security community.' There is a navigation bar with four tabs: 'FILE', 'URL', 'SEARCH', and a settings icon. The 'SEARCH' tab is currently selected and highlighted with a blue underline. Below the navigation bar is a large magnifying glass icon over a fingerprint. Underneath the icon is the text: 'Search for a hash, domain, IP address, URL or gain additional context and threat landscape visibility with OUR THREAT INTELLIGENCE OFFERING.' At the bottom of the page is a search input field containing the hash 'b8ef959a9176aef07fdca8705254a163b50b49a17217a4ff0107487f59d4a35d' and a 'Search' button.

E esse é o resultado:

Trata-se de um arquivo malicioso do Excell .xls.
